Summary

First-class Pharmacology graduate with experience in pharmaceutical laboratory analysis, quality assurance, patient support, and healthcare data analytics. Skilled in Power BI, data visualization, healthcare reporting, and analytical problem-solving. Experienced in analyzing healthcare datasets and developing interactive dashboards that support operational, financial, and clinical decision-making. Strong communication, leadership, and teamwork abilities with growing expertise in healthcare and business intelligence analytics.

Experience

Pharmacology Industrial Training | Service Pharmaceutical Company

Jun 2024 – Aug 2024

- Worked in the chemical laboratory analyzing different pharmaceutical products ranging from systemically absorbed to locally acting drugs.
- Gained practical experience using laboratory technologies to test for bioactive substances in drug formulations.
- Assisted in pharmaceutical testing procedures and laboratory documentation.

Quality Assurance and Control | Service Pharmaceutical Company

Jun 2024 – Aug 2024

- Participated in quality assurance processes to ensure raw materials met production standards.
- Assisted in testing raw materials for required bioactive substances before production.
- Helped ensure proper drug labeling, packaging, and product condition before market distribution.

Pharmacist Assistant | Service Pharmaceutical Company

Jun 2023 – Aug 2024

- Assisted the resident pharmacist in dispensing medications accurately and safely.
- Reviewed patients' medical reports and helped ensure proper medication administration.
- Educated patients on medication usage, dosage instructions, and possible side effects.

Data Analytics Projects

Healthcare Analytics Dashboard (Power BI)

2026

- Designed and developed 4 interactive healthcare dashboards using Microsoft Power BI.
- Analyzed over 1 million patient records covering patient demographics, hospital operations, clinical performance, and financial reporting.
- Built visual reports to monitor patient admissions, average length of stay (LOS), insurance provider trends, revenue performance, and medical conditions.
- Applied data cleaning, data transformation, and visualization techniques to generate meaningful healthcare insights.
- Generated analytical insights showing balanced gender distribution, dominant elective admissions, increasing LOS trends, and yearly revenue fluctuations.
- Developed KPI cards, slicers, charts, and interactive visualizations to improve healthcare reporting and decision-making.
- Demonstrated analytical storytelling and dashboard reporting skills for operational and strategic healthcare planning.

Education

Bachelor of Science – (B.Sc.) in Pharmacology

Novena University, Ogume, Delta State

First Class Honours

2021 – 2025

Secondary School

Easy Step Academy, Okuokoko

2015 – 2020

Certifications

Data Analytics Certification | TechCrush

Accredited by the American Council of Training and Development

- Completed professional training in data analytics with practical experience in Power BI dashboard development, data visualization, and healthcare data analysis.
- Gained hands-on experience in data cleaning, reporting, analytical storytelling, and business intelligence concepts.

Honors & Awards

Award of Excellent Service | Novena University

July 2025 Awarded for leadership role and outstanding service as President of the Department of Pharmacology

Skills

- Power BI Dashboard Development
- Data Visualization and Reporting
- Healthcare Data Analytics
- Microsoft Excel
- Data Cleaning and Transformation
- Dashboard Reporting
- Pharmaceutical Chemical Analysis
- Laboratory Management
- Quality Assurance and Control
- Leadership and Team Management
- Marketing and Sales Skills
- Verbal and Written Communication

Hobbies

Reading, Sports, Games and Outings
